## Mission Checklist STS-122

### Crew Members

Commander - Stephen Frick | Pilot - Alan Poindexter

#### Mission Specialist

Leland Melvin | Rex Walheim | Hans Schlegel | Stanley Love | Leopold Eyharts

### Mission Highlights

Carried out by Atlantis on February 07, 2008. The launch was scrubbed twice due to problems with the ECO sensors. Mission was extended by two days, because of medical issues with astronaut Hans Schlegel that delayed EVA-1 by 24 hours, and to allow for additional time to activate the Columbus research module. Astronaut Leopold Eyharts replaced expedition 16 Flight Engineer Daniel Tani who returned to Earth onboard Atlantis.

### Payload

European Columbus Laboratory Module.

Nitrogen Tank Assembly (NTA). A currently installed NTA on the P1 truss will be replaced by a new one and returned to Earth.

External airlock with Androgynous Peripheral Docking system (APDS). The external airlock, with docking system, provides an airtight tunnel between the two spacecraft after docking.

Integrated Cargo Carrier (ICC) Lite. A smaller version of the large ICC used for smaller payloads.

Control Moment Gyroscope (CMG). A replaced gyro from the Z1 truss segment will be returned to Earth.

European Technology Exposure Facility (EuTEF). An external experiment that will be installed on the outside of Columbus.

SOLAR. An external experiment for studying the Sun with unprecedented accuracy that will be installed on the outside of Columbus.

### Flight Summary

Launchpad: Kennedy Space Center (KSC) 39A | Orbit: 122NM | Inclination: 51.6 | Orbits: 219

Duration: 11 Days, 19 Hours, 29 Minutes, 0 Seconds | Landing: Kennedy Space Center
